

Sharkskin®

MICROBE DEFENSE

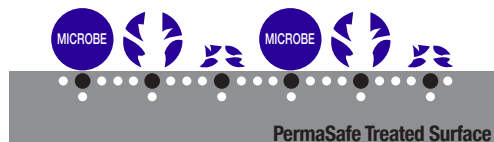

Powered by PermaSafe™

HOW IT WORKS

Sharkskin Microbe Defense's multi-step system begins with an initial disinfection of your vehicle's passenger cabin, air ventilation system and duct work, trunk and other cargo areas.

Your vehicle's interior is then blanketed with the patented Antimicrobial Surface Protectant which cures, becoming invisible to the human eye. Upon application, PermaSafe's unique formula bonds with your vehicle's interior surfaces. Once the protective coating has dried, Sharkskin Microbe Defense goes to work using a protective barrier to destroy harmful bacteria and viruses.

DID YOU KNOW?

Your vehicle's steering wheel, seats, carpet and gear shift contain an average of 700 bacteria per 10 square centimetres¹

Your vehicle's trunk contains an average of 1,000 bacteria per 10 square centimetres¹

- Some drivers spend more than 100 minutes a day in their car²
- Vehicles are breeding grounds for germs, bacteria, viruses and fungi, also known as microorganisms, or "microbes"
- Confined spaces that are frequented by people, like a car, are prone to microbial activity

WHAT IS MICROBE DEFENSE?

Sharkskin Microbe Defense Powered by PermaSafe is a multi-step system that disinfects and provides antimicrobial protection for all of your vehicle's interior surfaces.

- Eliminates 99.99% of harmful bacteria and viruses without the use of harmful chemicals

BENEFITS

- 360-degree protection for interior surfaces
- Destroys 99.99% of harmful bacteria, viruses and allergens
- Destroys mold and mildew
- Helps protect against odours

Non-corrosive

Non-hazardous

Non-toxic
